**DIAGNOSTIC MEDICAL SONOGRAPHY
RELEASE & WAIVER FOR ULTRASOUND SCANNING
DMS6**

Students in the Diagnostic Medical Sonography program are required to perform ultrasound examinations of the abdomen, pelvis, vascular tree and heart on other students and to allow other students to perform these same examinations on them during laboratory sessions.

Abnormal findings are occasionally discovered. Students will be informed of any abnormal findings and advised to contact their physician for any necessary follow up examinations.

The American Institute of Ultrasound in Medicine (AIUM) Safety statement for Training and Research of March 1997 says:

“Although no hazard has been identified that would preclude the prudent and conservative use of diagnostic ultrasound in education and research, experience from normal diagnostic practice may or may not be relevant to extended exposure times and altered exposure conditions. It is therefore considered appropriate to make the following recommendation:

In those special situations in which examinations are to be carried out for purposes other than direct medical benefit to the individual being examined, the subject should be informed of the anticipated exposure conditions, and of how these compare with normal diagnostic practice.”

I have read the above safety statement and consent to being scanned by other students as required of the laboratory portion of the program. I understand the BCIT is not responsible for any unforeseen events that may occur.
