**MEDICAL RADIOGRAPHY**
**ACKNOWLEDGEMENT OF PHYSICAL AND PROGRAM REQUIREMENTS** (MRD1)

Medical Radiography is a physically demanding profession. It requires a high level of manual dexterity, physical strength, controlled sensitivity to disturbing medical scenarios and the ability to work in a busy and sometimes stressful environment.

Medical Radiography practitioners must be able to:

- exert fine motor control;
- lift and move incapacitated patients or heavy lab equipment;
- stand for long periods of time;
- demonstrate good visual depth perception and discernment of grey colour scale;
- work in an environment containing chemicals that may provoke sensitivity reactions.

The BCIT Medical Radiography Technology Program includes classroom, laboratory and clinical experiences that impart necessary knowledge and skills for practice in the field. Training includes non-invasive exercises such as participation in clinical simulations as well as invasive training such as participation in venipuncture exercises. These exercises will:

- be explained or demonstrated by a BCIT staff member or other assigned qualified personnel;
- involve students, staff members, clinical personnel, or consenting volunteers as subjects;
- be conducted in an environment appropriate for learning;
- be supervised;
- require that students be prepared and employ due care and attention in their completion.

There are three clinical practicums for the BCIT Medical Radiography program which are assigned at accredited clinical sites throughout British Columbia. Each clinical placement will be at a different clinical site. Students are responsible to make travel and accommodation arrangements for the clinical practicums and are required to comply with confidentiality policy as well as clinical site, BCIT and program policies while attending clinical practicums.

---

**DECLARATION:**

I am aware of the physical requirements for the Medical Radiography program as described above. I confirm that I possess the physical strength and attributes to perform these functions.

I hereby also acknowledge I am aware of the program requirements for the Medical Radiography program as described and agree to participate in classroom, laboratory and clinical praciticums that impart necessary knowledge and skills for practice in the field. I also agree to abide by the clinical site selection process for the clinical practicums.

I also understand that, once I have been provisionally accepted, I will be required to submit a criminal record check and complete an immunization form. The British Columbia Health Authorities require students to be fully immunized in order to go out to their clinical practicum. I understand that failure to complete this form will prevent me from attending the Medical Radiography Program.

I recognize that in order to have relatively current CPR practice prior to the first clinical practicum, it is best to update my CPR HP certification just prior to the start of the program.
