BC Cancer Agency Cytotechnology Training Program Evaluation Requirements

The **BC Cancer Agency Cytotechnology Training Program (BCCA)** requires the following for all evaluations completed by the International Credential Evaluation Service (ICES).

1. Evaluation Report Required

- a) The **BCCA** requires a **Comprehensive Evaluation Report** for all evaluations conducted by ICES. This can be ordered by completing the Credential Order Form section of the ICES Application Form. The cost of a Comprehensive Report is **\$225.00** per credential. Detailed information about ICES fees, reports, and documents required as well as a copy of the ICES Application Package can be found at <http://www.bcit.ca/ices>.
- b) A **Supplemental Report (\$125.00)** is required in addition to the Comprehensive Report. This is ordered by completing **Section C** of the ICES Application Form. In **Section C** please write "**BCCA**".

Please note: In order to meet British Columbia Cancer Agency admission requirements, courses and/or equivalent education must have been completed within the last five years, or an individual must have current training and/or experience. Contact Marianne Kurlak for more information (604) 877-6000, local 4901.

2. Documents Required by ICES

- a) **Original Documents:** ICES will need a complete set of *Original* documents for each credential that you are paying to be evaluated. A complete set of documents normally contains at least two parts:
 - (1) The document awarded upon completion of the credential (may be called a diploma, diplom, degree certificate, certificate, or other names depending on the country from which it is issued). In many countries, people hang this document on their wall.
 - (2) The academic record, showing the courses or subjects studied, the grades earned, and the hours of study or number of credits for each course (may be called a transcript, detailed marks card, relevé de notes, examination report, extract, student's book, index, or other names depending on the country from which it is issued).

If you do not have these documents, you will need to request them from the institutions you attended.

- b) **Translations:** All required documents written in a language other than French or English must be accompanied by an English translation completed by a certified translator. All translated documents must also be submitted with the original in the original language.

(Continued on page 2)

Affiliated Colleges: ICES only accepts educational documents from the institution that awards the credential. For that reason, ICES does not accept documents from affiliated colleges or institutes. ICES must see documents issued from the awarding institution.

3. Number of Credentials

When you apply for a Comprehensive Report, you must indicate the number of credentials you wish to have evaluated. A “credential” is one partially or fully completed educational program taken at one institution or school leading to a certificate, diploma or degree. Any coursework completed at two or more institutions and applied (or transferred) toward a credential is considered a separate credential. If you wish to have more than one credential evaluated, please include the additional fee with your ICES Application Form and make arrangements to have each institution send the necessary documents.

4. Additional Copy of Report

All clients receive two copies of the completed report. The first copy is always sent to you; the second copy of your report will be sent directly to the **BCCA**. Please indicate this in **Section D** of the ICES Application Form. If you do not indicate where you want your second copy sent, it will be automatically sent to you. If you require more than two copies of your report, the fee is **\$10.00** per copy.

5. Contact Information

If you have not already done so, please contact the **BC Cancer Agency Cytotechnology Training Program** to see if they require any additional information from you. They can be reached at:

BC Cancer Agency Cytotechnology Training Program

200 - 601 W. Broadway

Vancouver, BC
