

I am a Term 3 Bachelor of Nursing student with an interest in making student interests understood and incorporated into BCIT policies. I am actively involved in student representation since the start of my program. I am currently a Councilor for the School of Health Sciences with the BCIT Student Association, participate in the nursing Student Success Committee, and am a Set Rep for my cohort. Through these roles, I have successfully advocated for changes to my program and compliance with BCIT Educational policies, and have worked to address student concerns with BCIT and the Student Association.

I believe it's important for students and faculty to work together to create a positive, fair, and meaningful learning environment for everyone. My goal if elected as a student representative on the Educational Council is to ensure student perspectives are voiced and incorporated into policy decisions.
