AP Physics courses may be approved on a case-by-case bases but are not preferred. For students who want to take a sequence of courses over summer to meet the entry requirements, PHYS 131 and PHYS 118 at the University of British Columbia are recommended as they can typically both be taken in one summer.

Many post-secondary institutes have Adult Basic Education (ABE) physics courses that are equivalents for Physics 11 or Physics 12. These courses may have 0xxx or 0xx labels (e.g., PHYS 0311 and PHYS 0312 at BCIT). ABE, 0xxx, or 0xx courses from any post-secondary institutes are **not** acceptable to meet the physics entry requirement.
