# BCIT STUDENT INNOVATION CHALLENGE

[bcit.ca/applied-research/students/innovate](http://bcit.ca/applied-research/students/innovate)

BCIT Student Innovation Challenge is an annual competition providing students from across the institute to launch their entrepreneurial ideas, inventions, or applied research projects. The goal of the challenge is to create an inclusive space for innovation, encouraging students to turn their bright ideas into business plans and prototypes of commercial products.

The challenge is divided into three categories, Entrepreneurship, Applied Research and Sustainability. All participating students are offered the opportunity to attend entrepreneurship workshops and collaborate with faculty and researchers.

We invite you to become a sponsor and experience student innovation from its inception all the way to success.

You will have a unique opportunity to position your brand in front of 50,000 students, 18 - 25 year old demographic across five campuses and 380 programs – daily!
