

BCIT COVID-19 SAFETY PLAN ACADEMIC SPACES

The BCIT COVID-19 Go-Forward Plan outlines the risk assessments, control measures, and the organizational process for our safe return to campus. All returning programs/courses must adhere to this process. Please refer to the [BCIT COVID-19 Go-Forward Plan](#) for additional information.

RATIONALE FOR ON-CAMPUS ACTIVITY

Please provide a short description explaining the need for students to be on campus. Your narrative should be focused on the practical elements of the program or activity that are critical to achieving learning outcomes, and why on campus components cannot be replicated in an online or alternative environment (e.g. student bringing learning equipment home).

The program identified key learning outcomes that are necessary to build the kinesthetic skills required for the profession. These skills were developed in consultation with our clinical partners, and then reviewed and implemented by the program. It is important these hands-on skills are developed on-campus before students proceed to clinical placement. Of note, the learning outcomes identified cannot be replicated online or taken home with them as these outcomes require the use of medical equipment, for example, a microscope, microbiology equipment, and chemistry instrumentation. These learning outcomes also need the watch full eye of the program staff to ensure appropriate instructions and feedback are provided.

CONTROL MEASURES

COVID-19 SAFETY PLAN: CONTROL MEASURES CHECKLIST

Directions for completing a Safety Plan:

1. *First step of this process is to review the [BCIT COVID-19 Go-Forward Plan](#) as the overall planning document for this process.*
2. *Use this checklist as a tool to assess COVID-19 control measure preparedness for students and employees and the spaces they will be using. Refer to the BCIT COVID-19 Go-Forward Plan for standardized safety guidelines and procedures.*
3. *For each control measure, state the details. If the control measure is a 'No' or 'NA', please provide a brief explanation.*

COVID-19 SAFETY PLAN ACADEMIC SPACES

4. The manager requests all PPE requirements by submitting this draft Safety Plan to the PPE@bcit.ca.
5. Implement all the safety measures in this Safety Plan.
6. The manager completes a site visit to ensure all control measures and safety supplies are in place.
7. The manager signs the completed Safety Plan and submits it to returntocampus@bcit.ca for approval.
8. Once approved, the COVID-19 Safety Plan is posted in all work areas identified within this plan.

Note: The workspaces cannot be used until all applicable control measures are in place and Safety Plan is approved. For additional resources the [Risk Assessment Controls Guidance and Hierarchy of Controls](#). For assistance email ssemohs@bcit.ca.

ELIMINATION					
1.	Room(s) set up to allow for 2 metres physical distancing during instruction and practice. Note: Contact returntocampus@bcit.ca for room capacity and layout if needed.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p>Exceptions allowed as per BCIT COVID-19 Go-Forward Plan, Risk Matrix Summary (explain): The labs are designed to accommodate 10-12 student workstations. The plan is to assign a student to every other workstation, leaving a gap between each person. Doing so, ensures a safe distance is maintained between the students. Furthermore, barriers will be installed for added safety.</p> <p>In addition to the room being set up to allow for 2M distancing, staff will wear a face mask and move throughout the room in a way that maintains a safe 2M distance between themselves and students. In situations where close proximity is necessary for the lab activity (see section 42), staff will ensure they are wearing face masks and shields. For instance, the majority of close proximity work would be in the form of working at a microscope, practicing pipetting, looking at microbiology cultures or test tube reactions as these techniques involve subjective assessment which is best done with the staff.</p> <p>Students have designated workstations to conduct the lab activities. In cases where students need to move throughout the lab, they will follow the floor markings, and similar to staff, maintain a safe 2M distance between themselves and staff. . In situations where close proximity is necessary for the lab activity (see section 42), students will ensure they are wearing face masks and shields.</p> <p>See Appendix A for proposed floor plans.</p>
2.	Demonstration, work and assessment stations are set-up to allow for 2 metres physical distancing.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Exception allowed as per BCIT COVID-19 Go-Forward Plan , Risk Matrix Summary (explain): Similar to section 1.
3.	Identified area(s) where students wait outside of teaching space until allowed inside by instructor.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Students will not line up in the hallways before they enter the lab. Instead, the program has scheduled the courses to have staggered start times to eliminate these lines up.

4.	Work has been scheduled to minimize numbers of individuals on campus at one time.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p><i>Under the guidance of the Hierarchy of Controls for COVID-19 in the Go-Forward Plan, the program created a new delivery structure for the curriculum. In general, the program moved to a blended format where the majority of learning is provided online, except key hands-on activities.</i></p> <p><i>For the lab activities delivered on campus, the following set of principles were considered when building a schedule: the program reduced student occupancy, reduced the amount of time on campus (2 days a week, instead of 5), staggered lab start and end times, and created smaller cohorts (10-12 students per set, instead of 20-24).</i></p>
5.	In shared spaces, safety protocols have been put in place to reduce close contact between users.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p><i>The practices in the shared spaces are similar to the ones outlined in Sections 1, 3, and 6. Also, signage will be displayed as necessary. Staff workstations will be assessed to ensure 2M distance is achieved.</i></p> <p><i>In addition to the engineering controls, the administrative controls involve staff coordinating with colleagues which days they will be on campus to minimize as much as possible their overlap in shared spaces.</i></p>
6.	Movement within the room is identified, such as with directional arrows, for walkways and entrances/exits.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Signs or arrows on the floor identifying directions.</i>
7.	Water fountains are put out of service, and only touchless water bottle filling station available.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
8.	Mobile fans have been removed or put out of service.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
7.	Washrooms have been identified.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>If yes, Washroom occupancy limit <u>1</u></i>
8.	Break area(s) for student use have been identified.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<p><i>If yes, what control measures are in place to maintain physical distancing? The program intends to use SW1 2019, 1205, 2009, 2005 as a break out room.</i></p> <ul style="list-style-type: none"> • <i>SW01-2019 – capacity 15 – break room</i> • <i>SW01-1205 – capacity 14 – break room</i> • <i>SW01-2005 & 2009 – capacity 10 – break room</i> <p><i>Occupancy Limit _____ If there is an occupancy limit, is sign posted? 30.	Students have dedicated tools/equipment, e.g., items are not shared between students.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
31.	If cleaning common touch points or tools/equipment not practical, then it is identified when hands are washed/sanitized before and after use.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Explain: Medical Laboratories are continually exposed to potentially infectious materials because the nature of the profession is to analyze patient blood, body fluids, or tissues for diagnostic purposes. It would be impractical to clean the entire lab, including medical equipment all the time. That in mind, all laboratory spaces are considered biohazardous; therefore, staff and students wear the appropriate PPE in the room (e.g., gloves, gowns, lab coats, and goggles etc). <i>In addition to wearing PPE, hands are sanitized before entering the lab and donning PPE, including gloves. Hands are washed before exiting the lab after doffing gloves.</i></i>

Procedures in place to screen students on a daily basis.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	The health screen poster is available for reference and is posted on building doors. Students and employees are expected to self assess daily, and the BCCDC self-assessment tool can be used to support this. The Self-assessment tool is provided on the Program and Student Community of Practice (CoP) Learning Hub page. Student will be informed via email and reminded on the CoP page to complete this assessment each day they attend the campus. Furthermore, the building and rooms will have health screening posters as reminders to complete this task.
36.	There is a procedure in place if a student or employee becomes ill on campus.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Refer to the COVID-19 Pandemic Scenario Playbook for more information. If the person is reporting symptoms, ask them to avoid others and return home. If they require immediate medical attention, call First Aid and 911.

For instance, the Med Lab program utilizes gloves, lab gowns and coats, goggles, and face shields. Students also receive N95 fit testing before they enter the clinical settings. In addition to the standard laboratory PPE practices, face masks or shields will be used to avoid the spread of COVID-19, which will be discussed in section 42.
41.	Training is provided for the above PPE to students and employees.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	This information is provided on the Program and Student Community of Practice Learning Hub page. Moreover, students received PPE training in Level 1 (Jan – May, 2020) as part of their regular course learning outcomes. All staff are trained in the selection and use of PPE as part of their educational training and professional experience. Staff are also introduced to PPE from the BCIT's Pandemic Exposure Control Plan online course.
