

Environmental Health Approved Entrance Requirements Equivalency Courses

We accept a wide range of courses from post-secondary institutions across Canada and it is not possible to list them all. The courses listed below in each category are only a small sample of courses that we have already approved for prior applicants. This list is meant to assist those who might be planning to take one of these courses - if the course you plan to take is on the list, we will accept it as satisfying the entrance requirement in that category. If you plan to take a course that is not on this list and you would like approval prior to registering, please contact **Dale_Chen@bcit.ca** with the institution name and the course name, number and outline/description. If you have already taken courses that are not on the list, please submit your application as soon as possible and we will assess the courses you have taken. This list will be updated periodically.
