

## Re-Admit – Returning Students

Medical Radiography readmission students are those who have been admitted at least once to the Medical Radiography program and are now applying for readmission into the program beyond Level 1.

Students returning to the program in Level 1, are required to apply as a new applicant.

If eligible to return Level 2 or above, students will apply online for readmission to the program and indicate the desired level. In support of the readmission request, the student must upload the **Full-Time Technology Program Re-Admit form**. As part of the re-admit application, the student is responsible for submitting a success plan to resolve any previous difficulties.

Readmission is not guaranteed. Readmission students will only be accepted following a program review of the success plan and is dependent upon clinical seat availability. Readmission students will be required to demonstrate competence in clinical skills prior to being accepted.

Medical Radiography readmission students are subject to the associated administration fees, lab access, course, and audit fees.

### Guidelines

- A. The medical radiography program reserves the right to deny an applicant readmission to the program after a single clinical failure due to:
  - violation of BCIT guiding principles and standards of conduct (policies 5101, 5102, 5104)
  - violation of the Canadian Association of Medical Radiation Technologists (CAMRT) Code of Ethics (<http://www.camrt.ca/mrt-profession/professional-resources/code-of-ethics/>).
- B. Students who have withdrawn from or failed any Medical Radiography course that is a prerequisite for a course in the next level of the program are deemed to have failed out of the program. Such students must apply for readmission when they want to return to the program.
- C. Students who have any combination of two instances of withdrawal or failure in a Medical Radiography course may be readmitted to the program “with written permission from the Associate Dean, who will detail any special considerations in a written contract with the student”. (BCIT Policy 5103).
- D. Length of time out of clinical environment will influence which level of the program to which a student may be readmitted. Students who have been out of the program for two sequential terms may be required to repeat a previous clinical course for which they have credit.
- E. Students may be required to audit or retake courses already successfully completed. Students cannot take any courses in the next level, until they have successfully completed all courses in their current level.
- F. Students will be required to demonstrate competence in clinical skills prior to being accepted.
- G. Students will **only** be accepted following a program review of the success plan and is dependent upon clinical seat availability.
