

FortisBC Sustainable Energy Management Grant

School of Construction and the Environment and Aboriginal Services

FortisBC is committed to supporting Aboriginal students who have a passion for energy management, wish to build a career in the industry, and share their successes back at home.

FortisBC is offering up to four educational grants, valued at approximately \$25,000 for students entering BCIT's Sustainable Energy Management Program. This will cover the full cost of the program as well as any required books and equipment.

WHY BCIT's SEMAC PROGRAM?

The Sustainable Energy Management Program is a completely online part-time studies program that will provide graduates with the skills and knowledge of sustainable energy management principles, approaches, techniques, and tools, in order to be able to function quickly and effectively in the energy management industry. Energy management is the practice of energy conservation, in short making sure that industry is only using the energy it needs and that it is being used as efficiently as possible. This program consists of nine courses that cover the technical aspects of energy management along with the business aspects and human behavior aspects. This holistic program provides graduates with a well-rounded base for succeeding in the energy management industry.

SUPPORTING ABORIGINAL STUDENTS

BCIT Aboriginal Services offers educational and moral support to our Aboriginal students attending our trade and technology programs. You will have opportunities to connect with fellow students and have access to a team of professional Aboriginal staff members that specialize in teaching, program development, advising and services.

APPLYING FOR THE GRANT

Applicants must be Aboriginal students. Preference will be given to applicants from British Columbia. To apply please visit <http://www.bcit.ca/aboriginal/scholarships.shtml>
