

CSE SCIENTIFIC STYLE MANUAL

BRITISH COLUMBIA
INSTITUTE OF TECHNOLOGY

BCIT LIBRARY

bcit.ca/library

Scientific Style and Format: The CSE Manual for Authors, Editors, and Publishers. 7th ed. was published by the Council of Science Editors (formerly named the Council of Biology Editors) in 2006. *Scientific Style* is a documentation style for writers in the various areas of scientific study. A copy of the manual is available for borrowing from the Burnaby Campus Library stacks, call number **T 11 S386 2006**.

The *CSE Manual* describes two systems of documentation, the citation-sequence system and the name-year system. The system used will often depend on the field of study, or the preference of the instructor.

The sites listed below provide background information and examples of how to apply this citation style.

Council of Science Editors

Outlines differences between the 6th and 7th editions.
