They will wear face shields, masks and gloves to preform tasks and skills together. When practicing skills such as “patient” transfers they will require disposable isolation gowns due to the peer to peer contact.

RATIONALE FOR ON-CAMPUS ACTIVITY

Please provide a short description explaining the need for students to be on campus. Your narrative should be focused on the practical elements of the program or activity that are critical to achieving learning outcomes, and why on campus components cannot be replicated in an online or alternative environment (e.g. student bringing learning equipment home).

COVID-19 SAFETY PLAN ACADEMIC SPACES

- 1: X-ray positioning practice requires that students find physical landmarks on a human body in order to take an image of the appropriate area – this cannot be learned without physical practice. As much as possible, lab prep will be done on videos to limit the amount of time students need to practice in person, and Shaderware software will be used to allow students to practice the visual components remotely.
- 2: Lastly, patient care requires that students practice how to move patients physically and accommodate for various support devices – this must be done with another person in order to practice safely when they get to the hospital in their second term. Some assignments and practice items will be done from home via video submissions.

CONTROL MEASURES

COVID-19 SAFETY PLAN: CONTROL MEASURES CHECKLIST

Directions for completing a Safety Plan:

1. First step of this process is to review the [BCIT COVID-19 Go-Forward Plan](#) as the overall planning document for this process.
2. Use this checklist as a tool to assess COVID-19 control measure preparedness for students and employees and the spaces they will be using. Refer to the [BCIT COVID-19 Go-Forward Plan](#) for standardized safety guidelines and procedures.
3. For each control measure, state the details. If the control measure is a 'No' or 'NA', please provide a brief explanation.
4. The manager requests all PPE requirements by submitting this draft Safety Plan to the PPE@bcit.ca.
5. Implement all the safety measures in this Safety Plan.
6. The manager completes a site visit to ensure all control measures and safety supplies are in place.
7. The manager signs the completed Safety Plan and submits it to returntocampus@bcit.ca for approval.
8. Once approved, the COVID-19 Safety Plan is posted in all work areas identified within this plan.

Note: The workspaces cannot be used until all applicable control measures are in place and Safety Plan is approved. For additional resources the [Risk Assessment Controls Guidance and Hierarchy of Controls](#). For assistance email ssemohs@bcit.ca.
